

We powder your breast milk.

Longer storage. More convenience. Better infant nutrition.

We help moms reach their nursing goals

We powder our customers' breast milk and send it back to them in a safe and convenient package that lasts for three years with no refrigeration.

The Milkify Kiosk solves the storage problem at work, empowering nursing moms to continue their breastfeeding journey with confidence upon their return to the office.

Safe and used
by milk banks
worldwide

Chemical
and
additive-free

Backed by
decades of
research

LEARN MORE AT WWW.MILKIFY.ME

We are partnering with forward-thinking companies in Houston to make the **Milkify Breast Milk Drop-Off Kiosk** available on their premises.

Interested parties are encouraged to contact info@milkify.me to learn more.

How it works

- 1 Nursing mothers drop off their milk to the Milkify Kiosk, in their own lactation bags.
- 2 The milk is kept frozen in this secured freezer, until picked up by Milkify.
- 3 We powder the frozen breast milk and send it back to our customer's home address the following week.
- 4 When ready to use, the powdered milk is simply mixed with warm water.

The Milkify Kiosk helps nursing moms thrive at work

- Moms who pump at work must keep the milk refrigerated all day, including during their commute home.
- This is a logistical and cognitive burden that leads to negative impacts on wellbeing and productivity.
- The Milkify Kiosk enables moms to immediately drop off their milk in a secure freezer – right in their lactation suite at work.

- Milkify brings the benefits of breast milk plus the convenience of formula to the working mother.
- Longer, more convenient storage encourages extended breastfeeding, leading to significantly better health and wellness – for both mom *and* baby.
